DEPARTMENT OF PUBLIC HEALTH DENTISTRY

MISSION:

To achieve expertise in population-based dentistry, community-based disease prevention and health promotion along with patient care, teaching and research.

VISION:

To promote oral health and provide manpower and other resources

- Make people responsible for their own oral health
- Bridge the gap between community and dental care services.
- To conduct research for improvement of oral health.
- To practice and promote evidence- based dentistry.

GOALS:

- To prevent and control oral diseases, minimize their impact on health and psychological development, promote oral health, organize community efforts at individual and community level, and take up leadership roles in solving community oral health problems.
- Impart oral health education.
- Patient diagnosis, treatment planning and performing comprehensive dental care
- To assess oral health needs; plan, implement and evaluate oral health programmes.
- Develop necessary manpower and utilize them effectively for dental public health programmes.
- To adopt ethical principles in all community oral health and research activities.

DEPARTMENT OF PERIODONTICS

Chalakkara, P.O. Pallor, Mahe-673 310
U.T. of Puducherry. Ph : 0490 2337765

MISSION

Department of periodontics envisions to be recognized as a centre of excellence in the field of periodontology by providing optimum academic environment and patient care thereby becoming a preferred destination for aspiring students.

VISION

To motivate the students by providing quality education ,training through continuous evaluation to make the provisional globally competent.

GOAL

The Goal of Department is to educate the students to be competent in recognizing and diagnosing periodontal disease and providing periodontal therapy to their patients.

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

MISSION

- To encourage students in the field of research moral biology, to update them with latest news on research and development in the field of medicme
- To be attached to a research Center to establish joint research programmer.
- To open a separate unit for cranio-facial research
- To make our institute the center for international dental programs
- To make our institute under joint collaboration the center for international students exchange Programme

Principal

Chalakkara, P.O. Pallor, Mahe-673 310
U.T. of Puducherry. Ph : 0490 2337765

VISION

- To get our department recognized for PhD programs
- Equipped and efficient at par with teaching standards of international universities
- Students to attend international dental school teaching programs through a joint venture
- Guiding our students for international research programs
- Have international internship Programme for a period of time.
- Improve Student-teacher interaction by means of technology and digital methods
- Scholarship Programme

GOAL

- To maximize the resources and opportunities for every student to make their vision come true

DEPARTMENT OF PROSTHODONTICS

MISSION

MINDS is committed to promote dental health, research and education for the well-being of the patient, students, staff and community

VISION

To be a global leader in dental care & education by continuous improvement and innovation

Principal
Mahe Institute of Dental Sciences & Hospital
MAHE

Chalakkara, P.O. Pallor, Mahe-673 310
U.T. of Puducherry. Ph : 0490 2337765

GOALS

- ✦ To achieve knowledge and skill in theoretical and clinical laboratory, attitude, communicative skills and ability to research with understanding of social, cultural, education and environmental background of the society
- ✦ To have acquired adequate knowledge and understanding of applied basic and material sciences.
- ✦ able to provide Prosthodontic therapy for patients with competence and working knowledge with understanding of applied medical, behavioral and clinical science that are beyond the treatment skills of the general BDS graduate and MDS graduate of other specialties to demonstrate evaluative and judgment skills in making appropriate decisions regarding prevention, treatment aftercare and referral to deliver comprehensive care to patients.

DEPARTMENT OF ORAL AND MAXILLOFACIAL SURGERY

MISSION

Department of oral & maxillofacial surgery looks forward to bring out the best in every student and transform them to excellent clinicians who can help society attain better health care

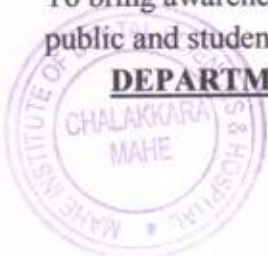

VISION

We are determined to keep in pace with rapidly advancing field of health and to prepare our students to be compatible internationally

GOAL

To bring awareness regarding diseases pertaining to oral & maxillofacial region among public and students

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

U.T. of Puducherry. Ph : 0490 2337765

DEPARTMENT MISSION

- To collaborate with national and international universities for advanced research work.
- To develop and foster a community of global leaders dedicated to improving human health by integrating orthodontia and medicine at the forefront of education, research and patient care, especially in the field of TM Disorders and aesthetic orthodontics.

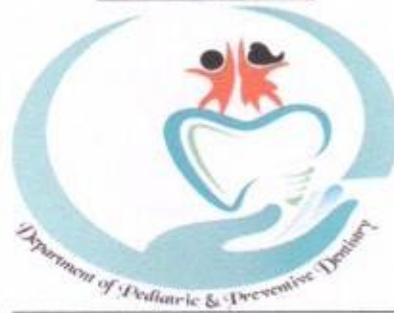

• DEPARTMENT VISION

- The Primary goal of dept of Orthodontics is to inculcate the contemporary orthodontic skills and to enable students to achieve academic and clinical excellence. Department of Orthodontics deals with treatment of malocclusion and abnormalities related to the craniofacial region and have the responsibility to study and supervise the dental and skeletal growth from birth to maturity. The department has a good patient inflow of more than 70 patients daily. The college and hospital is situated in heart of the city Mahe. Department has the best infrastructure with separate UG, PG clinics, seminar rooms, and with the latest equipment and facilities and a vibrant atmosphere. Dynamic Faculty remains its forte.

• DEPARTMENT GOALS

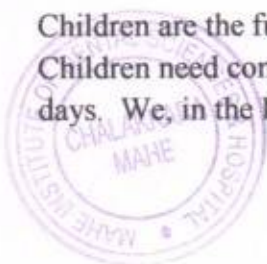

- "Patient-centered education committed to excellence"-Our department aims to impart excellence in clinical care and patient satisfaction, and endeavors to train outstanding clinicians and future faculty. We train students to be committed in clinical as well as research work and groom them to be world class leaders in the field. Our department imparts to undergraduates and post graduates students holistic training thereby facilitating career development and job opportunities.

**DEPARTMENT OF PAEDIATRICS AND PREVENTIVE
DENTISTRY**

OUR MISSION

Children are the future of our Country. The oral cavity is the mirror of our face, it is said. Children need constant care and attention of the oral cavity and teeth during their childhood days. We, in the Department of Pedodontics would like to strive to educate and instill

Principal

Affiliated to Pondicherry Central University, Recognized by Dental Council Of India
Chalakkara, P.O. Pallor, Mahe-673 310
U.T. of Puducherry. Ph : 0490 2337765

MISSION

To provide best education and research facilities for students through innovative and need-based teaching programs and to provide excellent patient care services for community in the diagnosis of diseases involving maxillofacial region.

VISION

The vision of the department is to be a Internationally recognized center of excellence and referral unit for education and research in Oral Biology, Forensic Odontology and Oral & Maxillofacial Pathology.

DEPARTMENT OF GENERAL PATHOLOGY

MISSION

General pathology is committed to

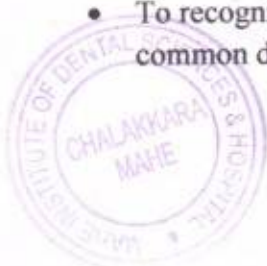

- Provide quality laboratory services to patient's dental health care
- Support research activities among faculty and students
- Provide quality education for all the UG&PG students

VISION

To be a model department in dental care and dental education by continuous improvement & innovation

GOALS

1. To teach & train the undergraduate students to learn the scientific way of studying the diseases & to enable them
 - To recognize the etiology , pathogenesis , macroscopy and microscopy of the common diseases in dentistry

Principal
Mahe Institute of Dental Sciences & Hospital
MAHE

- To enable them to gain knowledge of various modalities available in laboratory diagnosis in identifying diseases & make them use it during the practice
 - To enable them to identify the signs and symptoms of diseases
 - To enable them to apply the knowledge gained during general pathology in understanding other subjects in the course
2. To train the post graduate students in pathology to understand their speciality studies through lectures, group discussions, seminars, quiz & innovative ways.
 3. To provide clinical laboratory services to the patients through outpatient laboratory.
 4. To effectively complete the teaching , examination & evaluation programs as per schedule & policies.
 5. To provide assistance to the college administration through active participation in various committees, teams and other assigned work to improve the standards of the institution.
 6. To provide assistance to slow learners and underperformers in pathology to improve their performance through Mentoring & Personal guidance.
 7. To participate in student evaluation in internals and university examination and complete the task in times as per institutional and university policies and guidance.
 8. To provide support & assistance to students & staff in the research activities & publications.
 9. To train and provide assistance to the young teachers in preparation of lectures , methods of teaching & methods of evaluation
 10. To conduct & participate CDE programs for dentists, PGs, faculty and specialist to update the current knowledge.
 11. To participate in camps and public awareness programs conducted by the institution to educate the public about causes and preventive measures of common diseases.
 12. To support & encourage environmental protection initiatives in the department.

DEPARTMENT OF PHARMACOLOGY

MISION:

Principal
Mahe Institute of Dental Sciences & Hospital
MAHE

MAHE INSTITUTE OF DENTAL SCIENCES & HOSPITAL
Affiliated to Pondicherry Central University, Recognized by Dental Council Of India
Chalakkara, P.O. Pallor, Mahe-673 310
U.T. of Puducherry. Ph : 0490 2337765

- Pharmacology is a branch of medical sciences that deals with study of pharmacon-meaning drug, their sources, effects, uses and adverse effect.
- The study of pharmacology equips the students in rational use of drugs which makes them competent dental professionals.
- To encourage research activity among faculty and students.

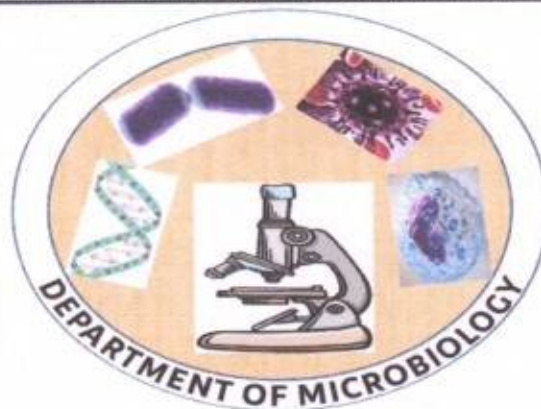

VISION:

- To achieve above goals through proper innovation, training, and to see our students globally competent and compassionate dentists.

GOALS:

- To teach and train students to be globally competent basic specialist dentists.
- To achieve this adaptation of time frame for compilation of an effective teaching schedule, examination pattern and evaluation methods.
- To identify slow learners and adopting an effective measure to rectify their problems through discussion with students, parents and administrators.
- To train the junior faculty to be good teachers and trainers.
- To train auxiliary faculty to be competent to handle any situation in laboratory.

DEPARTMENT OF MICROBIOLOGY

MINDS

Principal
Mahe Institute of Dental Sciences & Hospital

Affiliated to Pondicherry Central University, Recognized by Dental Council Of India
Chalakkara, P.O. Pallor, Mahe-673 310
U.T. of Puducherry. Ph : 0490 2337765

MISSION

To be a premier faculty in providing high standard of training and research to produce skilled dental professionals with holistic approach.

VISION

To be a centre of excellence in oral health microbiology, education and research and to function as a catalyst to promote learning and research in the field of dental microbiology.

GOAL

At the end of Microbiology course the student is expected to:

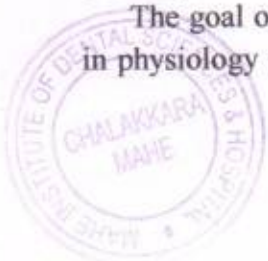

1. Understand the basics of various branches of Microbiology and able to apply knowledge relevantly.
2. Apply the knowledge gained in related medical subjects like General medicine and General surgery and dental subjects like Oral pathology, Community dentistry, Periodontics, Oral surgery, Pedodontics, Conservative dentistry and Oral medicine in higher classes.
3. Understand the practice of various methods of sterilization and disinfection and to control the infectious diseases in the clinics.
4. Have a sound understanding of various infectious diseases and lesions in the oral cavity.

DEPARTMENT OF PHYSIOLOGY

GOAL:

The goal of the department is to focus on making students understand the basic concepts in physiology which helps to provide comprehensive knowledge in the physiological basis

Principal

Mahe Institute of Dental Sciences & Hospital
MAHE

MAHE INSTITUTE OF DENTAL SCIENCES & HOSPITAL
Affiliated to Pondicherry Central University, Recognized by Dental Council Of India

of health and disease. The exciting progress in medicine, dentistry and health care in this century has largely originated from the application of physiology to clinical medicine. It is interesting to note that many of the outstanding physiologists have been well-known physicians. "The physiology of today is the medicine of tomorrow".

MISSION:

Unfold the mystery of functioning of human body and understand the importance of co-operation and co-ordination between different cells and different organs of human body for successful living.

VISION:

To be a top ranked academic department in the disciplines of physiology in India and beyond.

DEPARTMENT OF ANATOMY

MISSION

To be a premier faculty in providing high standard of training and research to produce caring dental professionals with holistic approach.

VISION

To be center of excellence dental anatomy, education and research and to function as a catalyst to promote learning and research in dental anatomy.

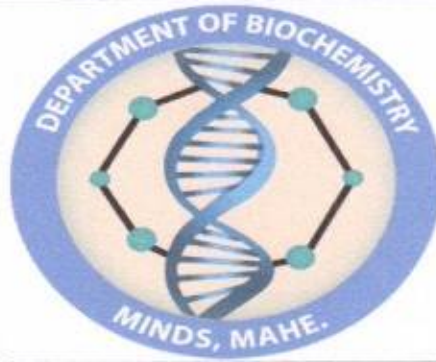

Principal
Mahe Institute of Dental Sciences & Hospital

DEPARTMENT OF BIOCHEMISTRY

MISSION

Develop and provide optimum academic environment to produce professional Graduates and Post graduates

VISION

Motivating the students by providing quality education, training through continuous evaluation

GOALS OF THE DEPARTMENT

Understand the basics of various branches and apply the knowledge relevantly

A sound knowledge of Biochemistry and other basic disciplines like molecular biology, immunology and nutrition is essential to understand the various areas of dental and related health sciences.

For medical and dental students study of biochemistry is essential not only to understand the metabolism, function and growth of normal human body but also to understand the aberrant Biochemistry of humans in various diseases and clinical conditions.

Study of medical Biochemistry helps to understand the biochemical basis of many diseases for their diagnosis, prognosis and treatment.
