

POST-EVENT REPORT

TEETH AS CLUES

The Forensic Odontology Add-on Course for first-year BDS students concluded successfully, featuring the participation of 68 enthusiastic students and guidance from six experienced faculties. The event, held from 17-30.5.2023 aimed to introduce students to the vital intersection of dentistry and forensic science.

The course encompassed a diverse range of topics, including bite mark analysis, dental records examination, and identification techniques crucial in forensic investigations. Through engaging lectures, interactive workshops, and practical demonstrations, students gained comprehensive insights into the application of dental expertise in legal contexts.

The collaboration with esteemed faculties enabled students to delve into real-life case studies, enhancing their understanding of forensic odontology's practical implications. The event fostered a platform for intellectual exchange and networking, encouraging students to explore this intriguing field further.

Participants' active involvement and positive feedback underscored the program's success in meeting its educational objectives. We extend our gratitude to the faculties for their invaluable contributions and commitment, making this event a profound learning experience for all involved.

The Forensic Odontology Add-on Course's resounding success highlights its significance in broadening students' perspectives and fostering their interest in this specialized domain.

POST EVENT REPORT

To boost the students existing academic knowledge, skills, counter the challenges/problems/doubts etc. and provide a deeper understanding about the subject an Add-on course "**MASTERING THE ART OF DENTAL IMPRESSION**" was conducted by the department of Prosthodontics Crown & Bridge And Implantology from **24th April'23 to 16th May'23**. The course was conducted within the Mahe Institute of Dental Sciences and Hospital premises.

The design of the course was confirmed with the resource persons, organising committee and the CDE committee of the college, the targeted group were the IInd year BDS students. The objective of the course was to improve the students' knowledge regarding dental impression materials and techniques and the challenges arising during the manipulation of various materials. There were about 68 participants and each session was for one hour so that the students didn't get saturated.

The course was planned in such a way that the basic concepts was etched more into the existing ideas of the students by means of lectures and demonstrations. The demonstration sessions were done on the next day after the respective lecture session, the students got the opportunity to manipulate materials and understand the various properties of the materials regarding its clinical use. Towards the end of the course students were given the opportunity to make mutual impressions pertaining to a single impression material to familiarise the clinical situations which they will encounter from the next year of their BDS course.

The Add-on course started on April 24th 2023 with the introduction talk on impression and impression materials, further sessions were on impression compound on 26th and 28th April where the lecture and demonstration and hands on manipulation was conducted. On 29th April the same was carried out on the topic zinc oxide eugenol impression material. On 2nd, 3rd & 5th may sessions on hydrocolloid impression materials (Agar and Alginate) and their manipulation were discussed. Elastomeric impression material sessions were on May 6th, 8th & 9th. Sessions on basic idea pertaining to complete denture and techniques in complete denture impression making was discussed on 10th May. The same regarding Fixed Partial Denture, Removable Partial Denture and Implants and Implant impression techniques were carried out on 12th, 13th & 15th May respectively. On May 16th mutual impressions using alginate was also conducted where tray selection and impression making was done by each student.

The improvement in the students' level were assessed in the interactive sessions during the end day where they were able to give justification for use of each material at different situations.

POST EVENT REPORT

The Hands on Certificate course on topic "EXODONT" was conducted by the Department of Oral and Maxillofacial surgery from 18.02.2023 to 17.04.2023 was a great success. The program started at 8.30 am with registration. The Course was inaugurated by Dr. Anil Melath by lighting the lamp. The speaker Dr. Manoj Kumar explained in detail about how to perform an extraction from basics. After the tea break, started with the second session, the speaker gave a detailed lecture on different methods of extraction on impacted tooth. After lunch break, hands on workshop conducted for the participants. Certificate for the participants were distributed after the final session and random feedback were collected from the participants.

POST EVENT REPORT

IPL

IPL-Implant Placement and Loading was organized and conducted by the Department of Periodontics, Department of Prosthodontics and Department of Oral and maxillofacial Surgery, Mahe Institute of Dental Sciences and Hospital 15-02-23 to 14-03-23. A series of Lectures and Hands on from basic implant placement to impression techniques were delivered and demonstrated to all the participants. The program was inaugurated by Dr Anil Melath, Professor and Head of the department of Periodontics by briefing the course objectives.

On 15-2-23, Dr Manoj Kumar, Professor and Head of department of Oral and Maxillofacial surgery delivered a lecture on surgical anatomy of maxilla and mandible. The next few days were lecture with hands on basic implantology under the guidance of Dr Arjun MR , Reader, Department of Periodontics. Implant placement was demonstrated on mandibular models. All the participants were given opportunity to place dummy implants on models. Detailed lecture on flap designs, sequences of implant drills and placement, Osseo integration principles were delivered to the participants.

The last 1 week was handled by department of Prosthodontics on treatment planning, Prosthetic components, various impression techniques and implant loading. Dr Abhinav Mohan Reader, department of Prosthodontics detailed on various impression techniques and presented few cases of implants. Dr Prasad Aravind, Professor and head of the department delivered lecture on implant loading and on all on 4 implants. A positive feedback on the add on course was given by all the participants throughout the lecture. It was a highly interactive one.

EVALUATION FORM
HANDS ON COURSE ON IMPLANT PLACEMENT AND LOADING
IPL-23

NAME-

- 1) Inflammatory changes in the soft tissue surrounding an implant is diagnosed as
a) peri-implant gingivitis b) peri-implantitis c) peri-implant mucositis d) peri-implantosis
- 2) Periodontal disease in diabetic patient follows
a) Consistent pattern b) Distant pattern c) Circadian pattern d) No consistent pattern
- 3) The distance between implant and adjustment tooth should be atleast
a) 7 millimetre b) 1.5 millimetre c) 3.5 millimetre d) 3.75 millimetre
- 4) Not an indication for tooth grinding
a) Wear facets b) TMJ pain c) Crepitus d) Cemental wear
- 5) A non invasive way of evaluating implant stability by impact resistance
a) periotest b) trans gingival probing c) bone sounding d) probing
- 6) Hydroxyapatite coating of dental implants was introduced by
a) Deroot b) Hahn and polich c) Kay d) Clemow
- 7) Most plausible factor for dental implant fracture
a) peri implantitis b) Bending overloads c) Non passive fit prosthesis d) Manufacturing imperfections
- 8) First implant system developed by
a) Noble biocare branemark b) Noble biocare steri oss c) ATI-strauman
d) Astra
- 9) The minimum mesiodistal space required for the placement of two standard diameter implants between teeth is
a) 8 mm b) 20mm c) 10 mm d) 14 mm
- 10) Total arch length reduced due to Mesial migration of teeth
a) one centimeter b) 3 centimetre c) 0.5 centimetre d) 0.15 centimetre

Post Event Report

We take this opportunity to inform about the recently conducted Add-on course to third year BDS students on 09/02/2023 to 24/02/2023 at Lecture hall III. The programme was successfully carried by Department of Microbiology.

Topic : "Break the Chain"- Infection control in Dentistry.

Speakers : Dr. C. Selvakkumar, Dr. Raj A.C, Dr.Anjali K, Dr. Sruthi P&
Dr.Rajeswari.V

Infection control in Dentistry- Series of topics were discussed covering various areas on Prevent susceptible patients from acquiring pathogenic organisms, to limit the spread of antimicrobial –resistant, Strategies to improve hand hygiene, prevention of infection and control and Clinical waste disposal policies.

It was an opportunity for our students to gain essential knowledge on the recent trends and the procedures involved on the topic were discussed. Once again, on behalf of the Department of Microbiology, I thank the chairman, Principal, and Vice-Principal for their assistance in making this event a grand success.

Dr.C.Selvakkumar

REPORT ON ADD ON COURSE

Department of Oral Medicine and Radiology conducted Add on course on 'dental imaging' for 3rd year post graduate students of MINDS. The course was conducted from 12/12/2022 to 30/12/2022. Total of eight postgraduate students (after considering attendance of more than 80%) from various departments were benefited from the course. Elaborated description on panoramic radiography and CBCT with hands on were provided during the course. Dr Nikhilraj, Dr Megha B and Dr Joena Sebastian were the resource persons and Dr Raj AC was the course coordinator. Evaluation was done at the end of the course and certificates were issued to the participants. Feed back was collected from all the participants. On evaluation of feed back all the participants appreciated at content and conduct of the program. It is decided to keep the same standards for the upcoming add on courses to be conducted by the department.

COURSE OUTLINE

- 12/12/2022- Introduction to course; familiarizing the course outline
- 13/12/2022- Intraoral radiography- revisiting IDPA, bitewing and occlusal radiography
- 14/12/2022- Advanced imaging techniques: MRI, USG
- 15/12/2022- Concept of panoramic radiography
- 16/12/2022- Concept of CBCT
- 19/12/2022- Advantage of CBCT over panoramic radiograph
- 20/12/2022- Advantage of CBCT over CT scan; limitations of CBCT
- 23/12/2022- Panoramic radiography- Hands on
- 26/12/2022- Panoramic radiographic interpretation
- 27/12/2022- Romexis software- hands on
- 29/12/2022- Romexis software- hands on
- 30/12/2022- Evaluation; feedback; valedictory function

Dept of Oral Medicine & Radiology

Mahe Institute of Dental Sciences

Mahe

To,

The Principal

Mahe Institute of Dental Sciences

Respected Sir,

As per request from Curriculum enrichment Committee, Dept of Oral Medicine and Radiology is planning to conduct add-on course for 3rd year post graduate students. Program is planned from 12-12-22 to 30-12-2022.

I kindly request you to grant permission for the same.

Thanking you,

6-12-22

Mahe

Yours sincerely

Dr. Raj A C

DEPARTMENT OF PERIODONTICS
PERIOSPECTIVE

POST EVENT REPORT

PERIOSPECTIVE- A hands on course on Periodontal diagnosis and surgery was organized by the department of Periodontics for the final year BDS Students. The course commenced from 6-12-22 to 29-12-22. Around 62 students attended the course. Dr Nanditha Chandran senior lecturer from the department of Periodontics and Dr Subair K professor were the program coordinators. The students were given an overview on periodontal diagnosis and surgical aspects. The course commenced by around 8.45am at the lecture hall. There was active participation from the students. A positive feedback was given by them.

10

1. Probing force for periodontal pocket

- a) 25g
- b) 50g
- c) 100g
- d) 10g

2. CAL is measured as a distance from

- a) CEJ to bottom of sulcus
- b) Gingival margin to sulcus
- c) gingival margin to CEJ
- d) None

3. Perio Temp , a device to measure the temperature of gingival tissues , can detect periodontal pocket temperature difference of

- a) 0.001°C
- b) 0.01°C
- c) 0.1°C
- d) 1.0°C

4. Most relevant factor in considering diagnosis of periodontal disease

- a) CAL
- b) Pockets
- c) Furcation Involvement
- d) Mobility

5. Instrument to measure periodontal pocket

- a) Williams probe
- b) Nabers probe
- c) Perio temp probe
- d) Diamond probe

6. The average inter-examiner error in pocket depth recording is

- a) 1.0mm
- b) 1.5mm
- c) 1.75mm
- d) 2.0mm
